

BRIDGE SOLUTIONS

Bridge Solutions are your local IT solution provider and we're here to help!

Based in Trowbridge, Wiltshire, we provide a range of IT services to local businesses and educational establishments.

Over the past 12 years we have worked hard to build on-going partnerships and go the 'extra mile' to ensure our clients receive the best level of service in this ever changing marketplace.

Our range of products & services include:

Support & Maintenance

Computers can be a great asset to any business when they're working well, however they can also be your worst nightmare when they malfunction.

Bridge Solutions provide a range of support & maintenance services designed to get your business up and running in the event of a system failure.

Customer Relationship Management

Getting new customers is important, however looking after existing customers is fundamental to the success of any business.

Microsoft CRM has been designed with an 'easy- to-use' interface allowing you to build closer relationships with your customers and helping you achieve new levels of profitability.

Network Security Audits

How secure is your data? With the number of network attacks, hackers and malicious spyware on the increase, network security is fast becoming the #1 concern to businesses.

Our security audit is designed to identify weaknesses and provide a comprehensive plan to address these vulnerabilities within your network.

Accounting Solutions

The availability of key financial data provides stability to your business and facilitates growth. The ability to budget, forecast and utilise financial data in strategic planning means your business progresses at the speed of your ideas.

Our accounting solutions implemented by experienced finance professionals will not just keep your business alive but ensure it thrives!

Telephone Systems

Reliable, easy to use and feature rich telephone systems are essential to the success of any modern business.

Bridge Solutions provide a range of systems from entry level to the latest VoIP (Voice over IP) technology that allows free calls over the internet.

Network Health Checks

Just like your car, computer networks need regular check-ups to ensure they continue to provide your business with a reliable service.

At Bridge Solutions, we believe in a proactive approach to support and our health checks are an essential part of this process.

Surveillance Systems

Camera surveillance over standard network cabling is fast becoming a common requirement for businesses and educational establishments.

Owner/Managers can now access their cameras anywhere in the world using a regular internet browser or a mobile phone.

Interactive Whiteboards

As a Smart accredited installer, we offer a range of interactive whiteboards to suit the most demanding business and educational applications.

Our installation services include sound systems, projectors, secure ceiling mounting systems and video conferences suites.

Cabling Installation

From small networks to large multi-building sites, we have the cabling solution to suit.

For data and voice networks, we install CAT5e, CAT6, CAT7 or fibre optic cable. We also offer a full range of AV installations including interactive whiteboards and projectors.

Website Development

We offer a wide range of web services including website development, web hosting and search engine optimisation.

Whether you're looking for your first 'starter' website, an enhancement to an existing site, or a full e-commerce electronic internet shop, we are here to help!
